

SAFER DRUG USE FOR STUDENTS

Always carry naloxone.

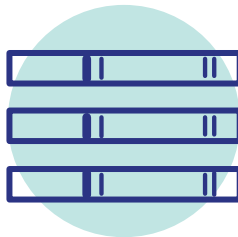

Never use drugs when you're alone.

Start low and go slow.

If you are going to use, use a small amount first to test the strength of the drug.

Use fentanyl test strips.

They can help you detect if there is fentanyl in your supply, but they're not foolproof. You can buy them online.

Don't mix your drugs with alcohol or tranquilizers.

Use new equipment and don't share it.

**NALOXONE.
CARRY IT.
ALWAYS.**
